

5.1P: In Person Check-in 2 – Answer Sheet

1. What was the most challenging aspect of the drawing tasks? Why?

I think the most challenging part in drawing tasks is to figure out the size and how the shape would be(i.e the circle need the coordinators and the radius, the line needs starts and end coordinators,...). I need to adjust it for a suitable shape

2. Review your answer to question 3 from check-in 1. Did you use any of the strategies you identified? How did they go?

Yes, I tried my best and used the given resource to figure out the Inheritance and the Polymorphism concepts but I still met some problems with the other 2 concepts

3. What are some strategies for success you can start or continue using for the remainder of the semester?

Practice more for the better use of OOP concepts
